## Company Profile

### Website Designing:

**Absolute Web** designs Web sites with a smooth, elegant style, international look, high impact, a Web-friendly palette, and fast-loading pages to produce the optimal Web experience: a site that gets its message across quickly and attractively.

While web designing, we work closely with our clients to develop a creative direction and architecture for the site, refining and building to meet the objectives our clients lay out for us. We believe that active client participation in the design and feedback along the way are crucial to creating a site that works for you.

Upon completion of site construction **Absolute Web** tests the site's functionality on multiple platforms and with multiple browsers. **Absolute Web** will then undertake additional testing to ensure that the site is functioning properly.

Finally, we work with the client's staff to ensure that it possesses all the technical skills needed to maintain and update the site on a regular basis because content that is refreshed regularly is one of the cornerstones to having a site that receives repeat visitors.

### Graphic Designing

Our clients need sites that inspire people to care about issues and to get involved. Sites that feature a lot of bells and whistles, that not all users can see, don't serve this purpose well. We make sites that are graphically engaging and accessible to a broad range of Internet users.

### Logo Designing

Every website is anchored by a logo. At its best, a logo makes a strong first and lasting impression. We have talented designers on staff who can help you by designing a logo that works with your branding and for the online experience.

#### Infrastructure:

- Excellent team of designers, animators and programmers
- Use of latest software
- Involved in development of several in diversified fields
- Powerful servers with high speed connectivity
- Development on interactive websites with database connectivity as well as E-commerce
- 2D, 3D animators, script writers for significant multimedia presentation, websites and electronic  
Data publishing, film titling etc.

#### Our Attitude:

**Absolute Web** as a group has an experience of developing large projects as our clients have been regularly receiving a steady response through the net. Designing and developing each **websites**, **multimedia** and **animations** has been a unique and joyful experience for us as we have been seeing our customers' confidence growing each day.

This confidence we have gained is because of the quality standards and transparency that we are maintaining. Being software developers, we have been able to give sturdy and technically strong backbone to all our projects.

At **Absolute Web**, quality is never an accident but results of good intentions and sincere efforts. With continuous interaction and will to remain flexible with our clients we try to get the best out of them. We consider every developing project to be a turnkey project and not as hit and run case. We believe in keeping the **websites** and **multimedia projects** well updated with latest tools and trends.

#### Creation:

The development of the project starts at **Absolute Web** with a professionally drawn story-board so that it gives a fair idea about the flow of the navigational theme. When the storyboard is approved, we develop about two/three demo pages to check the color combination that is best liked by the decision-makers and then go ahead with the rest of the development.

We DO NOT FORCE our clients to accept the pages designed, as it is but we are always flexible to redo it until they are fully satisfied. After the completion of project it goes through a series of quality checks before they are finally publish.
